PLANTS AND SEEDS WHOSE SALES ARE PROHIBITED IN WASHINGTON STATE

A Summary of Current
Regulations on Sales of Noxious
Weeds and Other Invasive
Exotic Plants

WAC 16-752-400 through 420
WAC 16-752-500 through 525
WAC 16-752-600 through 660

Washington State
Department of Agriculture
Plant Protection Division
Revised January 2010

WHY ARE SALES PROHIBITED?

Every year noxious weeds and other invasive exotic plants cost Washington millions of dollars in lost production, public and private control costs, and environmental degradation. These exotic introductions to Washington have displaced native plant communities, damaged range and recreational lands, and degraded fragile wetlands. Escaped ornamentals are one significant source of infestation. It is often difficult to predict which ornamentals will be invasive and aggressive. Scotch broom, purple loosestrife, and kochia are prime examples of plants which have escaped cultivation and caused enormous economic and environmental damage. The quarantines identify plants known to be invasive and a detriment to the state's natural resources. These regulations will serve to prevent the continued introduction of these problem plants into Washington.
